

**NICOLE**

Network for Industrially Contaminated Land in Europe

Joint event of **COMMON FORUM** and **NICOLE**  
hosted by *ISPRA and Consorzio Aussa-Corno, Italy*

on **20-23 April 2010**  
venue: **Jolly Hotel, Corso Cavour 7, Trieste, Italy**

## **Contaminated land management: opportunities, challenges and financial consequences of evolving legislation in Europe**

*Get together on 20 April 2010 at 19.00 hrs*  
*NICOLE Subgroup and Working Group meetings on 21 April 2010*  
*COMMON FORUM network meeting on 21 April 2010*

The members of the COMMON FORUM and NICOLE share a commitment towards responsible contaminated land management. The different backgrounds lead to a diversity of perspectives on how best to manage contaminated land.

The COMMON FORUM members are by definition very involved in building and structuring the legislative framework, whereas the NICOLE members are putting it into practise in their daily work. In order to improve insight in each others perspectives and, with that, improve mutual understanding, the two networks agreed to have a joint workshop. Currently a number of European Directives relevant for contaminated land is entering or approaching the stage of transposition to national regulation. This will definitely lead to changes that will affect contaminated land management in EU Member States. Both regulators as well as the private sector should be prepared for these changes. To discuss all these aspects and consequences we invite you to attend this event.

---

NICOLE is a network for the stimulation, dissemination and exchange of knowledge about all aspects of industrially contaminated land. Its 120 members of 20 European countries come from industrial companies and trade organisations (problem holders), service providers/ technology developers, universities and independent research organisations (problem solvers) and governmental organisations (policy makers). The network started in February 1996 as a concerted action under the 4<sup>th</sup> Framework Programme of the European Community. Since February 1999 NICOLE has been self supporting and is financed by the fees of its members.

The COMMON FORUM on Contaminated Land, initiated in 1994, is a network of contaminated land policy makers and advisors from national ministries in European Union memberstates and European Free Trade Association countries.

The objectives of COMMON FORUM are to develop strategies for the management and treatment of contaminated sites and for land recycling with respect to "sustainable resource protection" for contaminated land and groundwater.
